

Minor Project 2 - Web Development

Project Title: Fully Responsive Restaurant Landing Page

Overview

Design and build a fully responsive restaurant landing page using advanced CSS concepts including Flexbox, Grid, animations, and responsive breakpoints.

Tasks

- Build responsive navigation bar
- Create CSS Grid menu layout
- Implement Flexbox hero section
- Add CSS animations and transitions
- Create dark/light mode toggle
- Apply BEM naming methodology
- Optimize responsiveness for mobile/tablet/desktop
- Use CSS custom properties

Deliverable

- Responsive Restaurant Website
- Mobile & Desktop Layouts
- CSS Architecture Documentation
