

## Minor Project 1 - Web Development

### Project Title: Indian Startup Multi-Page HTML Website

#### Overview

Build a semantic multi-page website for a fictional Indian startup using pure HTML5. The project focuses on semantic structure, accessibility, and proper document architecture.

#### Tasks

- Create 4 linked HTML pages
- Implement semantic HTML5 structure
- Add navigation bar across all pages
- Create accessible contact form
- Build product/service table
- Add image gallery section
- Implement ARIA landmark roles
- Ensure proper heading hierarchy

#### Deliverable

- 4-Page HTML Website
- Accessible Contact Form
- Semantic HTML Documentation
